DETAILED ACTION

1. The reissue declaration filed December 5, 1997 is defective because:

does not comply with 37 CFR 1.175 (a) (1)

it does not clearly identify an error

does not comply with 37 CFR 1.175 (a) (2)

it lacks the statement "all error".

2. The original patent, or an affidavit or declaration as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

3. Claims 12-46 are rejected as being based upon a defective reissue Declaration under 35 U.S.C. § 251. See 37 C.F.R. § 1.175.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2838

5. Claims 12-46 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Masuda et al. (4,107,757).

Masuda et al. disclose a pulse power source in figures 1, 3, 4, and 6-9. Charge storage element - 1, capacitive load - 19, switches S0, S1 and S2 and figure 9 shows additional storage element - 38, 38a and 38b.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 12-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art in view of Masuda et al.

Applicant's admitted prior art figure 2 discloses the claimed invention except for a charge storage element. Masuda et al. teaches the use of a charge storage element-1 in figure 1 as a voltage source to the circuit. It would have been obvious to one having ordinary skill in the art the time of the invention to

Art Unit: 2838

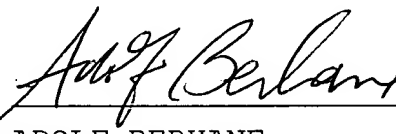

replace the voltage source of applicant's admitted prior art with the charge storage element of Masuda et al. in order to provide steady and cost effective power source.
